

INFORMATION TO USERS

This was produced from a copy of a document sent to us for microfilming. While the most advanced technological means to photograph and reproduce this document have been used, the quality is heavily dependent upon the quality of the material submitted.

The following explanation of techniques is provided to help you understand markings or notations which may appear on this reproduction.

1. The sign or "target" for pages apparently lacking from the document photographed is "Missing Page(s)". If it was possible to obtain the missing page(s) or section, they are spliced into the film along with adjacent pages. This may have necessitated cutting through an image and duplicating adjacent pages to assure you of complete continuity.
2. When an image on the film is obliterated with a round black mark it is an indication that the film inspector noticed either blurred copy because of movement during exposure, or duplicate copy. Unless we meant to delete copyrighted materials that should not have been filmed, you will find a good image of the page in the adjacent frame.
3. When a map, drawing or chart, etc., is part of the material being photographed the photographer has followed a definite method in "sectioning" the material. It is customary to begin filming at the upper left hand corner of a large sheet and to continue from left to right in equal sections with small overlaps. If necessary, sectioning is continued again—beginning below the first row and continuing on until complete.
4. For any illustrations that cannot be reproduced satisfactorily by xerography, photographic prints can be purchased at additional cost and tipped into your xerographic copy. Requests can be made to our Dissertations Customer Services Department.
5. Some pages in any document may have indistinct print. In all cases we have filmed the best available copy.

ACKNOWLEDGMENTS

This dissertation would not have been possible without the guidance, suggestions and support of many people.

To Professor Edgar Borgatta, who chaired the dissertation committee, I owe particular gratitude. It was he who was the inspiration for the subject matter of this dissertation and who provided me with the tools of knowledge necessary to undertake the task of researching it. To Professor William Kornblum and to Professor Charles Winick I owe appreciation for their helpful suggestions of areas of prior research to investigate. All three provided the faculty support, interest, and criticism essential during the process of completing a doctoral dissertation. My thanks go also to Louis Genevie for his suggestions.

To my many friends and colleagues at Crossley Surveys, I am very grateful for their support and encouragement. I am particularly appreciative of the encouragement and professional guidance given by Staats M. Abrams during the many years required to complete the undergraduate and graduate work leading to this dissertation. Without his understanding and support, I could not have completed this doctorate. To William Rhead, I am indebted for the meticulous care with which he coded the questionnaires. To Phyllis Schwebel and her staff, in particular Amy Greenberg, I am appreciative of the care with which the sample was designed and implemented. To Gay Hudson and her staff, Dolores Saffran, in particular, I am grateful for the care with which

the field work was executed. Kathleen Texeira and Nilda Pacheco have always provided expert typing help and I am very grateful to them. I am also appreciative of the help provided by Jose Ortiz in the production of this dissertation.

Anne Goldstein provided expert typing of the dissertation, itself, and I am most appreciative of her interest and skill.

My special thanks go to Michael D. Wolff of the Personal Products Division of the Warner-Lambert Company who gave me permission to use a survey custom designed for his company by Crossley Surveys as a vehicle for the field work for this dissertation.

To John Lobel and Arye Lubovitz at Datatab, I am indebted for their friendship and professionalism in providing the key punching and tabulation of the data.

My thanks go also to the respondents who participated in this research.

To Margaret McGarry and Clotilde Regazzi, and to my other friends and my family, I am most thankful for their encouragement during the years I pursued a doctoral degree.

Financial support for this project was provided by Crossley Surveys Inc. and Datatab, Inc.

Finally, I will always be grateful to my husband, Walter Dirk Meyer, for providing the understanding, encouragement and support which contributed to the completion of this dissertation.

CHAPTER I

BACKGROUND

Social Change and Movements

Social change has been, along with social consistency, a part of man's existence since the beginning of organized society. In modern times, social change has accelerated and scientists, in attempting to understand and predict it, have viewed it not only as a phenomenon, in itself, but in relationship to underlying and continuous patterns and trends in society. A broad definition of social change is ". . . the significant alteration of social structures (that is, of patterns of social action and interaction), including consequences and manifestations of such structures embodied in norms (rules of conduct), values, and cultural products and symbols."¹ This definition encompasses both social change, which refers to actual human behavior, and cultural change, which refers mainly to culturally meaningful symbols produced by human beings. The focus of this inquiry is on one of the outgrowths of social change--the social movement.

For the purposes of this discussion a social movement is defined as "socially shared demands for change in some aspect of the social order."² Throughout history, at different times and under variously differing conditions, the legitimacy of a particular aspect of a society

has come under attack by some part or parts of the society. At the same time, another part or parts of the society have wanted to maintain the status quo. As a consequence, there is conflict in the society. A social movement has the character of an indictment against all or part of a prevailing social order and carries with it a demand for change. It has an ideological component, i.e., a set of ideas, which specifies complaints, prescribes solutions, and presents justification for change. Herbert Blumer distinguished between "general" and "specific" movements³ which is similar to the distinction made by Gusfield between "directed" and "undirected" movements or segments of a movement.⁴ The "directed" part of a movement is the organized structured groups with specific programs, a formal leadership structure, a definitive ideology, and stated objectives. The "undirected" segment of the movement consists of those individuals who reflect the norms, values, and perspectives of the members of the organized groups, but are themselves not members of the groups. These members of the movement are referred to as "partisans." For example, the directed segment of the women's movement would be those individuals who are members of organizations supporting the goals of equal rights for women either because the group has taken an official stand on the position, i.e., National Council of Churches, or because they had been specifically formed for the purpose of furthering the rights of women, i.e., National Organization for Women (NOW). Partisans would be those individuals who by either voting behavior or by personal commitment endorse laws furthering the rights of women, but are not active in groups endorsing it.

The concept of a "social movement" is suggestive of people who are concurrently rejecting existing social values and proposing alternative ones. At the time they are doing this, they are attempting to recruit new members into the movement either as members of organized groups or as partisans, while they are fighting off those who resist their ideas of change. It is the system of generalized beliefs among both members of the organized groups and the partisans that characterizes a movement. The coherence and shared values of a movement, in its various forms and structures, as to beliefs of the legitimacy of their demands for the adoption of the new and the rejection of the old is what distinguishes a social movement from other types of interest groups and hostile outbreaks which do not develop into explicit demands for a changed society.⁵

On several occasions in this century social movements have resulted in changes in the society through Amendments to the Constitution of the United States. Two examples are the suffragette movement which resulted in the 19th Amendment prohibiting discrimination in voting based on sex and the temperance movement resulting in the 18th Amendment prohibiting the manufacture, sale, or transportation of liquor. In both these cases positive, i.e., State-imposed law, bowed to natural law or morality. Enacted rules of law are often a reflection of those natural law concepts which prevail at the time. "And when positive law appears to one group or another to deviate from natural law, to be unjust, it is in the name of natural law, or justice, that changes in positive law are advocated and brought about more often than in the

name of any other principle."⁶

History of the Equal Rights Amendment

A pending change in legislation that can be viewed as a result of a social movement is the Equal Rights Amendment (ERA). Resolutions proposing an equal rights amendment have been introduced in every session of Congress since 1923. Twice an amendment was passed by the Senate with the "Hayden rider" which provided that the equal rights amendment "shall not be construed to impair any rights, benefits, or exemptions now or hereafter conferred by law, upon persons of the female sex."⁷ Both times the rider made the proposed amendment unacceptable to the Senate Judiciary Committee which stated that the "qualification is not acceptable to women who want equal rights under the law."⁸ With the rise of the civil rights movement in the 1960s and with the growth of the women's movement, new efforts were made to pass the proposed amendment through both Houses of Congress until finally, in the early 1970s, the United States Congress recommended that the States approve the Equal Rights Amendment with House approval on October 12, 1971 (354 to 23) and Senate approval on March 22, 1972 (84 to 8). Hawaii was the first state to ratify the Amendment, and that vote came within one hour after the Senate vote on March 22.⁹

Prior to October 6, 1978, thirty-eight states had to ratify the ERA by March 22, 1979 in order for it to become the 27th Amendment to the Constitution of the United States of America. On October 6, 1978, however, after extensive lobbying by both pro- and anti-ERA forces,

the Senate gave final approval by a vote of 60-36 to extend the deadline date for ratification to June 30, 1982. The proposed ERA states:

- Sec. 1. Equality of rights under the law shall not be denied or abridged by the United States or any state on account of sex.
- Sec. 2. Congress shall have the power to enforce, by appropriate legislation, the provisions of this Article.
- Sec. 3. This Amendment shall take effect two years after the date of ratification.

Sec. 1 is the one usually reported as "the" Amendment. The Amendment would require all states as well as the federal government to examine all laws, regulations, and government practices in order to remove unequal treatment of individuals on the basis of sex.

Pro- and Anti-Era Forces

Many organizations have aligned themselves for or against the ERA. Some of the major organizations for the ERA are the AFL-CIO, American Bar Association, League of Women Voters, National Council of Churches, American Jewish Congress, YWCA in Convention, National Association for the Advancement of Colored People, U.S. Department of Labor and Women's Bureau, and the Democratic and Republican Parties. Some of the major organizations against it are The Church of Jesus Christ of Latter Day Saints (Mormon Church), The John Birch Society, and The National Society of the Daughters of the American Revolution. Additionally, some organizations have been formed specifically to either promote or defeat the ratification of the proposed Amendment, i.e., pro-groups such as ERAmerica, Housewives for ERA, and Men for ERA, and anti-ERA groups

such as Stop ERA, Operation Wake Up, and ERA Opposed.

Pro- and anti-ERA forces present different pictures of what will happen if the ERA is ratified. The pro forces emphasize the guarantee of equality for women and the resultant benefits for both men and women, while the anti-ERA forces emphasize the negative changes that they expect will take place in American society such as the lowering of moral standards, and the losses women will experience in status and security.

For instance, Housewives for ERA cites in a brochure one of the few reported law cases in which a wife desired to remain living with her husband, but wanted a court order for more adequate support. The couple had been married for over thirty years and the husband had assets of approximately \$200,000, but allowed no charge accounts or memberships and had not permitted his wife to purchase new clothing or furniture for a period of four years. The court decided that it had no power to issue such an order unless the couple was separated. So long as they lived together and the husband supplied subsistence, he was the master of the household. Housewives for ERA claims that ratification of the ERA would entitle a wife to financial support in compensation for her services as a homemaker.¹⁰ In contrast, anti-ERA forces claim that ERA will invalidate all state laws which require a husband to support his wife.¹¹

Additionally, many well-known individuals have taken a stand for or against the Amendment. Senator Sam Ervin, famous because of his television appearances during the Watergate investigations, wrote

a highly publicized anti-ERA letter addressed to the Chairman of the Committee on Constitutional Amendments of the North Carolina Senate in February of 1977. In the letter he quoted numerous constitutional scholars' opposition to the ERA and added his own opinion of the dangers of the Amendment:

The Equal Rights Amendment manifests an indifference to the inescapable realities of life. It is obvious to anyone who is both able and willing to face these inescapable realities that God and their own choice decree, that multitudes of women are going to become wives and mothers, and that laws which are adequate to protect the rights and define the liabilities of adult men and adult single women are not adequate in all respects to protect wives, mothers, and little children, and yet this is precisely what the Equal Rights Amendment undertakes to do.

It says in effect that all laws must apply equally, i.e., in like manner, to all men, all single women, and all wives and mothers. Surely each of these groups enacts at times differing and unequal roles in life, and hence necessity calls into play the truth proclaimed by Justice Frankfurter when he declared in Dennis v. United States, 339 U.S. 162, 185, that "There is no greater inequality than an equal treatment of unequals."¹²

Copies of Senator Ervin's letter were reprinted and circulated by Operation Wake-Up with the following addendum:

Dear Reader:

An electronic curtain has fallen over America. Censorship whether by the sins of omission are just as dictatorial in a free society as managed news in a dictatorship. Freedom¹³ of the press is not for the press . . . it's for everyone.

The chief philosopher and spokesperson of the anti-ERA movement is Phyllis Schlafly, head of Stop ERA, who is highly visible on television talk shows and the lecture circuit. She charged at a counter-rally held in the Sam Houston Coliseum in Houston during the National Women's Conference that "The Equal Rights proponents want to reconstruct us into a gender free society, so there is no difference between men

and women. I don't think that babies need two sex neutral parents. I think they need a mother and a father."¹⁴

On the pro-ERA side, Judy Carter, President Carter's daughter-in-law, is raising money for political campaigns against state legislators who have opposed ratification of the Amendment. In most cases, Mrs. Carter's appearances have been coordinated by ERAmerica, the national lobbying group for ERA. Others who are highly visible in the pro-ERA movement are Betty Friedan, author of the Feminine Mystique, and Gloria Steinem of Ms. magazine, who are both leaders of the feminist movement. Bella Abzug, presiding officer at the Houston National Women's Conference and former democratic representative from New York City, has long been one of the standard bearers of the women's movement.

The aforementioned National Women's Conference held in Houston from November 18-21, 1977 came about as a result of the naming in 1976 of a National Commission on the Observance of International Women's Year as sponsor for fifty-six State meetings all to be held before August of 1977 with the purpose of electing a delegation to attend the Houston Meeting with all expenses paid. ("State" includes the District of Columbia, American Samoa, Guam, the Virgin Islands and the Trust territory of the Pacific Islands.¹⁵) Of the 14,000 women who attended only about 400 were anti-abortion, anti-ERA delegates.¹⁶ As a result of the conference a twenty-five point revised National Plan of Action for Women's Rights was devised. Of first importance was the passage of the ERA followed by the right to abortion and lesbian rights.¹⁷

Status of Ratification of the ERA

As of March 1979, thirty-five states had ratified the Amendment. Support for the Amendment initially met with considerable success; it passed thirty state legislatures within a year after its passage by Congress in 1972. Since then, however, the ERA ratification process has slowed down--only four more states ratified by the end of 1975, none in 1976 and one in 1977. In February 1977, by a vote of 15-24 in the Assembly, the Nevada Legislature voted against the ERA. Similarly, in April 1977 in Florida, the ERA was defeated by a vote of 19-21 in the Senate. The Legislature of the state of Illinois is not expected to take any action on the Amendment until at least May 1979; however, pro-ERA forces feel that the Amendment has a chance of being passed at that time.¹⁸ The states of North Carolina, Georgia and Florida may ratify if a handful of anti-ERA state legislators are defeated in the forthcoming November elections. Rescission is also a factor--Idaho, Kentucky, Nebraska, Tennessee, and South Dakota have voted to rescind their earlier ratification of the ERA. The Justice Department has said that it is up to Congress to decide if rescission is legal. Because legal authorities presently contend that rescission is invalid, these five states are still counted among the ratified. ERA opponents are introducing rescission in increasing numbers of states. Target states of the anti-ERA forces are currently Washington, Indiana, Kansas, Rhode Island, Delaware, Texas, Montana, and New Mexico.

In October 1978, pro-ERA forces were successful in securing an

extension of the seven year deadline for ratification beyond the March 22, 1979 date. The resolution to that effect was introduced in the House of Representatives by Rep. Elizabeth Holtzman (D-N.Y.). Anti-ERA forces set their priorities on preventing the extension of the deadline for ratification, but they were not successful.¹⁹

The controversy over the extension of the deadline for ratification of the ERA created new furor in the ranks of the pro- and anti-ERA forces. Not all pro-ERA legislators were in favor of the extension. Rep. Robert McClory (R-Ill.), an ERA supporter, was quoted as saying that he planned to vote against the resolution. "It's as if we are in the eighth inning of a baseball game and we are behind. This proposal says we want to add three innings. But we may still win in the ninth inning."²⁰ Many ERA people felt that the trend was still toward ratification, and that the financial support being given to carefully screened pro-ERA legislators for campaigning in November 1978 would pay off. All opponents of ERA opposed extension. Phyllis Schlafly, the spokeswoman of the anti-ERA forces, said that "Without extending the deadline for ratification, ERA doesn't stand a chance."²¹ The New York Times in an editorial on Sunday, April 16, 1978, reiterated its argument against extension. Its argument was that for half a century seven years had been enough time to test the nation's sentiment for a constitutional amendment and this was no time to change.²²

In addition to providing financial support to local legislators who say they will vote for ERA ratification in their state, the pro-ERA movement has instituted an economic boycott on states that have

not ratified. Business groups in convention cities such as Chicago, Miami Beach, Atlanta, New Orleans, Las Vegas, Phoenix, St. Louis and Kansas City are concerned about the effectiveness of the boycott. Almost fifty groups, some of which hold some of the largest conventions in the country, have agreed not to meet in these cities. The attorneys general of the states of Nevada and Missouri filed anti-trust suits in March of 1978, requesting the federal courts for injunctions to stop NOW's effort to persuade other organizations to boycott non-ratified states. The courts ruled against the petitions.

Status of State ERA Amendments

Similarly, the passage of state amendments has encountered difficulty. The defeat of a proposed amendment to the State Constitution by the voters of New York State in November 1975 was unexpected, as was the loss of a similar ERA measure in New Jersey in the same election year. In some circles, the issue of the legislation evoked strong emotional responses. In total, sixteen states currently have an Equal Rights Statute. The blocking of the ratification of the various State Amendments has been attributed by pro-ERA forces to a "radical right" coalition. Anti-ERA forces have described the proponents of the Amendment as "anti-family," "women's libbers," "left wing," and "pro-abortion."

Prior Research

Although there is high visibility of the leadership in organizations for and against ERA, there is little hard data concerning the characteristics and values of anti- and pro-ERA individuals in the general population. Brady and Tedin²³ described the characteristics of women attending the hearing on rescinding the ratification of the Equal Rights Amendment in the Texas state capital on April 14, 1975. For that study, questionnaires were distributed by students to 154 women within the legislative hearing room and in the foyer outside. The students were instructed to select "representative" women from the 2,500 women attending, all of whom were supposedly in favor of rescinding. The questionnaires were filled in by the respondents and returned to the student interviewers. The authors conclude that the anti-ERA women in the sample tend to fit the pattern characteristics of the Religious Right. They are preoccupied with the state of morality in the country and have a strong commitment to traditional religion which seems to be a major source of their political beliefs. They are well-educated, middle to upper middle class political conservatives, who are politically active and articulate.

Tedin²⁴ subsequently compared the characteristics of the 154 anti-ERA women to 156 pro-ERA activist women interviewed throughout Texas in the spring of 1975. He concluded that the data "tend to support the journalistic speculation about the role of religion in the Equal Rights Movement, at least in the state of Texas."²⁵ He concluded,

while recognizing the limitations of his sample, that anti-ERA activists belong to conservative denominations and that pro-ERA activists belong to liberal denominations or are not affiliated with a religious denomination.

The popular media have given the ERA story extensive coverage since 1972. There has been a proliferation of polls reporting on attitudes toward the ERA, many of them failing to predict the defeat of the Amendment either at the hands of the voters or in the State Legislatures.

The Roper Poll, released on May 15, 1977, showed an erosion in support for the ERA. Opposition had not increased and support still exceeded opposition by well over 2 to 1; however, more people had developed mixed feelings about the ERA. The strongest support for the ERA came from liberals (68 percent), Blacks (63 percent), people under thirty (61 percent) and the college educated (55 percent). The strongest regional support came from the Northeast and the West, as well as from major metropolitan areas. Men (53 percent) supported ERA more readily than women, less than half of whom favored the Amendment (44 percent).²⁶

The NBC²⁷ and GALLUP^{28,29} Polls also show an erosion in support of the ERA. Recent results continue to show more men in favor of the Amendment (56 percent) than women (50 percent). Polls conducted by Louis Harris and Associates between 1975 and 1978 also showed erosion in support of the Amendment.³⁰

Systematic analysis of the social and psychological

characteristics of persons who support or oppose the ERA does not exist. Theoretical reasons for expecting support or opposition can be advanced from existing knowledge and theories, but an analysis of such theoretical speculation suggests the need for a conceptualization of the problem that is complex with regard to the values and organization structures of American society.

TABLE 1
ATTITUDE TOWARD PASSAGE OF THE ERA--ROPER POLLS^a

	1977	1975	
	March	December	June
Favor	48%	60%	61%
Oppose	20	21	20
Have mixed feelings (vol.)	27	15	15
Don't know	4	4	3

^aQuestion: The various State Legislatures are now voting on an amendment to the United States Constitution which would assure women equal rights under the law. As I'm sure you know, there is a lot of controversy for and against this amendment. How do you personally feel about it--are you in favor of the Equal Rights Amendment or opposed to it?

TABLE 2
ATTITUDE TOWARD PASSAGE OF THE ERA--GALLUP AND NBC POLLS

	1977 ^a	1976 ^b	1975 ^b	1974 ^c
Favor	53%	57%	58%	74%
Oppose	37	24	24	21
Not sure	10	19	18	5

^a1977 question: The women's conference adopted resolutions on a number of subjects. One resolution called for the adoption of the Equal Rights Amendment to the Constitution--the ERA. Do you favor or oppose passage of the Equal Rights Amendment? (NBC)

^b1975, 1976 question: (After respondents were asked if they had heard or read about the Equal Rights Amendment, they were then asked): Do you favor or oppose the Amendment? (Gallup)

^c1974 question: (Respondents were handed a ballot covering the issues and were asked): Suppose that on election day, November 5, you could vote on key issues as well as candidates. Please tell me how you would vote on each of these fourteen propositions: I would favor a Constitutional Amendment which would give women equal rights and responsibilities. (Gallup)

TABLE 3

ATTITUDE TOWARD PASSAGE OF THE ERA--LOUIS HARRIS AND ASSOCIATES POLL^a

Favor			
1975	1976	1977	1978
51%	66%	56%	55%

^aERA question: Many of those who favor women's rights favor the Equal Rights Amendment to the Constitution. This amendment would establish that women would have rights equal to men in all areas. Opponents argue that women are different from men and need to be protected by special laws which deal with women's status. Do you favor or oppose the Equal Rights Amendment?

Objective of the Research

The objective of this research was to expand the scope of inquiry into the nature of factors influencing adults' attitudes toward the Equal Rights Amendment (ERA).

The data were analyzed in two major areas--value orientations and background characteristics. The term "value" is used as "an enduring belief that a particular mode of conduct or that a particular end state of existence is personally and socially preferable to alternative modes of conduct or end-states of existence."³¹ The background characteristics of interest are the major social variables which often stratify people in the society such as age, sex, education, and so on.

CHAPTER II

METHODOLOGY

Overview

To meet the specified objective, qualitative and quantitative research were undertaken in addition to a search of the literature and the incorporation of news reports as to the developments in the attempt to ratify the Equal Rights Amendment. Focused interviews with women who are leading members of pro- and anti-ERA groups, and women who are in leadership positions in business and professional groups, but are not active in either pro- or anti-ERA activities, provided the data for the qualitative phase. The data base for the quantitative phase was drawn from a standard national survey by use of a drop-off questionnaire.

Qualitative Phase

Although the force of the inquiry was on the values and characteristics of the respondents in the quantitative phase in relationship toward their perceptions of the implications of the ERA, focused interviews were conducted with the above-mentioned women to gain insight into the notions that these individuals have as to the reasons why people are for or against the ERA and the reasons for the types of presentations they make of the issues.

In total six interviews were completed. An interview guide was

employed during the interviewing and the line of inquiry was directed to permit the eliciting of pertinent and meaningful information at the same time permitting free expression of ideas and attitudes on the part of the respondent. Probing was used throughout as a method of enlarging on areas of particular interest, i.e., perceptions of the reasons why women are for or against the ERA, perceived effectiveness of various stands in changing attitudes toward ERA, and so on. An attempt was made throughout the interviews not to disregard unexpected responses because they did not fit into the general framework of the discussion.

The interviews were conversational in tone, and in most cases, the respondents interacted freely and openly with the interviewer. In each case, before interviewing began, the respondent was told something about the interviewer's background, academic affiliation, and the nature of the interviewing method in order that she would feel at ease and perceive of herself as an equal part in the interaction process with the interviewer guiding the discussion and asking pertinent questions and she, the respondent, transmitting her attitudes and answering specific questions. The personality and attitude of the respondent dictated the interviewer's attitude and style of questioning in each case.

The respondents were informed prior to the start of interviewing of the academic purpose of the research and that the interviewer was talking with other women as well as themselves. They were told that their responses were confidential, and that nothing they said would be used in conjunction with their name without their permission.

Permission was asked to audio-tape the discussion.

The respondents were recruited by telephone and interviewed in person by this investigator. Three of the six respondents were known personally, and the remaining three agreed to be interviewed on the basis of referrals from business associates or colleagues. No attempt was made to standardize the setting of the interviews. Four interviews were conducted in offices and two in private homes. The interviews lasted between one and one and one-half hours. The time available on the respondents' calendars determined both the place and the length of interview.

The interviews were conducted with the following:

The editor-in-chief and publisher of a leading feminist magazine

The assistant to one of the most famous leaders of the women's movement

An active member of the Right to Life movement who is also anti-ERA

The housewife head of a New York City chapter of Stop ERA

The president of her own company who although in favor of ERA has never joined a feminist organization

A woman who is the advertising manager of a well-known publication who although in favor of ERA has never joined a feminist organization. This woman was the only Black interviewed in the qualitative phase.

The interviews were recorded on audio tape and selected verbatim comments were transcribed and incorporated into the analysis. The major areas of coverage included the following:

Background information as to involvement in organizations concerned with the proposed Equal Rights Amendment

Perception of attitudes held toward the ratification of the Equal Rights Amendment

Reasons that organizations present the Equal Rights Amendments to audiences as they do

Evaluation of the mass media's presentation of news about the Equal Rights Amendment

Reasons why the Equal Rights Amendment is encountering difficulty in the ratification process

Opinions as to what will happen to the proposed Equal Rights Amendment.

A copy of the interviewing guide appears in the Appendix. The field work was conducted between March 15 and April 11, 1978.

Quantitative Phase

A total of 838 usable questionnaires were returned by mail of the 3,952 questionnaires dropped off for a completion rate of 21.2 percent. (See Table 4.)

TABLE 4

ANALYSIS OF SAMPLE COMPLETION RATE

Number of questionnaires dropped off	3,952
Number of questionnaires returned	862
Incomplete, i.e., not usable	24
Complete	838
Completion Rate (based on number of complete questionnaires)	21.2%

The questionnaires were dropped off during the conducting of a nationwide consumer research project by Crossley Surveys, Inc., on behalf of the Warner-Lambert Company. Interviewers were instructed to hand out questionnaires to the individual who was the first adult, eighteen years of age and older, to be contacted in the household. The questionnaire, along with a stamped envelope addressed to Crossley Surveys, Inc. at 909 Third Avenue in New York City, was given to the respondent after all other interviewing was completed in the household. A small pencil was provided to encourage participation. The first page of the questionnaire was a cover letter signed by Franklin B. Leonard, President of Crossley Surveys, informing the respondents of the importance of the study and thanking them for their cooperation in advance. Respondents were invited to provide their name and address if they would like to receive a summary of the results of the study. The names and addresses were provided by 55.6 percent of the respondents.

The private households interviewed were selected using Crossley's National Directed Route Sampling Frame. This master sample is based on a classic area probability framework through the designation of cluster areas. The main features of this type of sample are that:

It proceeds from the systematic selection of counties, minor civil divisions, starting points, to households.

The interviews are widely distributed ensuring that all important population segments are properly represented.

The starting points and routes to be followed within cluster areas are predesignated, thereby eliminating interviewer discretion in selection of households.

It utilizes systematic substitution procedures instead of callbacks.

The statistical efficiency of any sample is increased to the extent that the things measured in the survey are correlated with the stratification criteria. Put another way, stratification insures that the sample will be representative in terms of the variables used to form the strata.

In the Crossley National Directed Route sample the following procedure was used to arrange the better of 3,000 U.S. counties into 80 strata:

1. All counties in the conterminous U.S. were subdivided into nine census divisions.
2. Counties were sorted into those in and out of standard metropolitan statistical areas (SMSA's).
3. SMSA counties were divided into five population size groups from those in SMSA's over one million down to those in SMSA's of less than 100,000 population.
4. Nonmetropolitan counties were divided into four groups according to level of urbanization from those that were 50 percent or more urbanized down to those with no urbanized place.
5. Nonmetropolitan counties were subdivided into several groupings reflecting intercensal growth rate.

Primary sampling units consisting of one or more contiguous counties were selected from the frame formed by the stratification described in the above five steps. Within each of the primary sampling units, first minor civil divisions and then clusters (blocks or enumeration districts) were selected on a systematic basis from geographically organized listings.

By definition, the sample is clustered. This increases economic efficiency but tends to decrease statistical efficiency. Clustering takes place at the initial level of selection of primary units, again in the selection of minor civil division, and finally at the block level. The Crossley sample was designed to optimize the degree of clustering at the three levels and to cluster to the least extent possible, consistent with practical field application. The sample contains eighty primary sampling units, each one of which is either an SMSA or a nonmetropolitan county. The primary sampling units about 400 minor civil divisions were covered. Selection of block clusters within the minor civil divisions were done using a random systematic procedure.

Up to the block stage sampling units were selected with probability proportionate to size. This procedure improves the statistical efficiency of the sample by insuring that important population segments are properly represented. The method also permits the sample to be allocated evenly among the final block clusters. From the master frame of clusters a total of 304 clusters in 49 Primary Sampling Units were selected. One household in each cluster was selected at random to serve as the starting point of a specific route along which interviews were attempted at every household. The route was randomly designated in such a way as to avoid households previously surveyed by Crossley. Thirteen successful household contacts were assigned to each route to yield the desired total sample size for the study. After each completed interview for the major study three households were skipped. There

were no callbacks; one attempt was made at each household along the route to achieve the specified number of contacts per cluster.

While there are problems in sampling with this procedure, it is expected that in the analysis of the relationship among the variables, the errors involved will be tolerable. On the other hand, such data will not be useful for estimating accurately percentage of population characteristics.

The sample distribution as compared to the distribution of households in the four major regions and according to degree of urbanization is shown in Tables 5 and 6.

A pretest of twenty-six interviews was conducted in the New York area prior to finalization of the questionnaire to determine the workability of the instrument and to learn if any of the items, themselves, were difficult to rate for any reason.

All completed questionnaires were edited and coded and then 100 percent checked for coding correctness. Incomplete questionnaires were removed from the study. The nature of the instrument, i.e., a self-administered questionnaire, resulted in a certain amount of missing information. These questionnaires were processed on an individual basis. Code categories for "other" were created first by listing the verbatim responses of a sample of completed questionnaires. These were then reviewed and classified prior to the start of full-scale coding.

The questionnaires were then keypunched and 100 percent verified. The data were subjected to a computer routine which checked for legal characters, completeness and consistency between responses. In case

TABLE 6
 COMPARISON OF DEGREE OF URBANIZATION OF SAMPLE TO
 U.S. POPULATION AS OF 12/31/77

	U.S. Population % Households	Sample % Households
Metropolitan 1,000,000 and over	43.1	46.8
Other metropolitan	32.2	31.1
Nonmetropolitan	24.7	21.1
Not stated	--	1.0

Source: Sales and Marketing Management 1978, Survey of Buying Power 121 (24 July 1978): B3.

of any errors revealed in this "cleaning" routine, the original questionnaire was examined to determine the correct information.

A frequency count and percentage of the responses to each question was prepared, along with a complete duplicate data set in card form. Tabulation of each question by the following variables with full annotation was provided:

Sex

Age (under 30, 30-49, 50 and over)

Education (no college, college)

Income (under \$15,000, \$15,000-\$24,999, \$25,000 and over)

Occupation (white collar, blue collar, homemaker/housewife)

Presence of Children in Household (adult household only, at least one child under 18, girl child under 18)

Attitude Toward Passage of ERA (definitely/probably should pass, definitely/probably should not pass)

Degree of Urbanization of Household (metropolitan 1,000,000 or more, other metropolitan, nonmetropolitan)

Familiarity with ERA (very/somewhat familiar, not too/not at all familiar)

Membership of Groups (support ERA only, oppose ERA only, both support and oppose ERA)

Political Party Identification (Democrat, Republican, Independent)

Political Views (Liberal, Moderate, Conservative)

Political Activity (very active, somewhat active, not at all active)

Religious Affiliation (Protestant, Catholic, Jewish)

Church Attendance (very/fairly regularly, occasionally, never)

The frequencies of the variables are posted on the questionnaire that

appears in the Appendix. All machine tabulation was completed by Datatab, Inc., of New York City.

Two events took place during the course of the study which may have affected the completion rate. The Christmas holiday midway during the field work probably resulted in more mail in most households with a resultant misplacing of some questionnaires. Additionally, the severe winter weather conditions throughout most of the country probably detracted some people from making a trip to a mailbox or post office as often as usual, so that the questionnaire was less likely to be mailed back.

The responses to some of the items may have been influenced by the publicity about the National Women's Conference held November 18-21, 1977 in Houston, Texas.

None of these effects is measurable.

The field work was conducted from November 28, 1977 to February 27, 1978. The field dates were extended beyond the anticipated four week period because of the weather. Approximately two weeks were allowed after the end of field work to permit receipt of the final questionnaire from the field.

Hypotheses Tested in Quantitative Phase

People will have a differing perception of what the ERA consists of and will relate to the issues involved differently. One task of this research is to discover and describe the differences. The hypotheses will be organized around the expectation of how people will

perceive the ERA and what kinds of people support or oppose it.

Among the hypotheses tested were: that women are more supportive than men of ERA, that the younger segments of the population are more supportive than the older, that liberals are more supportive than conservatives, that the college educated are more supportive than those with no college, that lower income and higher income groups are more supportive than the middle income groups, and that persons who vary in support of the ERA should also vary in underlying value patterns.

Variables used in analysis will be age, sex, education, occupation, religious affiliation, church attendance, income, presence and sex of children under eighteen years of age in the household, organizational affiliations, political activity and political party identification.

CHAPTER III

ANALYSIS OF QUALITATIVE PHASE

Pro-Era Interviews

Both pro-ERA women interviewed, the editor of a leading feminist magazine and a writer closely associated with one of the best known spokespersons of the women's movement, are fully committed to working for the ratification of the ERA both in their roles as leaders in pro-ERA organizations and personally as feminists. They feel they are working for the good of all women including those who do not realize that they need the benefit of equality under the law that will be guaranteed by the Amendment as well as those that know they are discriminated against because they are women, but find it either difficult or impossible to overcome sex discrimination in their own lives. One of the women expressed her feelings about the role played by the women's movement in society today in the following way. "We, the women's movement, are a movement for justice." These leaders of the movement accept that not all women who feel discriminated against on the basis of sex look to feminist organizations for leadership, and, in fact, do not identify readily with these groups. They attribute this to the type of coverage the women's movement receives from the mass media. One of the women said the following in relationship to

the print media's coverage of the women's movement.

A lot of the reason that women have trouble identifying with us is the way we are portrayed in the press. Many of us say that if all we knew about the women's movement was what we read in the press, we wouldn't have anything to do with it. We have a problem in the press, and the New York Times is an example of a liberal newspaper that has trouble covering the women's movement.

The New York Times was mentioned often by both women in relationship to bias in coverage of women's issues and also in the context of their position on the issue of the ERA and extending the time for its passage.

I was very disappointed in the New York Times editorial against extension. They clearly do not understand the issue. You cannot be for the ERA and not be for extension. What they said is that the ERA is not important enough to continue to work for. Of course, as late as 1970 the New York Times didn't support the ERA and they were pretty late getting on the suffrage bandwagon. The New York Times is considered a liberal newspaper, but not in terms of women's issues.

These feminists did not anticipate, in 1972, that the Equal Rights Amendment would encounter the difficulty in the ratification process that it has experienced. The element that was unknown at that time, according to these women, was how a "coalition of conservative groups" would join to obstruct the ratification process and how closely women's rights would come to be associated with the issue of abortion on demand.

I personally in '72 would not have predicted and did not foresee the extent to which the tide in the country would have moved . . . to the extent to which it (the ERA) would have been seized as a unifying issue by a coalition of groups who otherwise would not be dealing with one another, and I did not foresee the extent to which it was going to be possible for this coalition of folks on the right to obliterate or at least muddy the clarity of this Amendment with an overlay of emotional appeal on the abortion issue. I think that one

of the realities that we have to acknowledge is that the Amendment, per se, has successfully, in terms of the way in which the opposition has dealt with it, been identified--almost interchangeably--with the notion that abortion on demand is O.K.

These leaders of the women's movement are cognizant of the labels used by anti-ERA forces when referring to the women's movement and its members. In some instances they acknowledge the accuracy of these labels while challenging the inferences about the effects of the ERA based on the fact that the women's movement supports it.

They are right in associating homosexuality with the women's movement because the women's movement has supported gay rights, now supports gay rights and will continue to support gay rights because it's part and parcel of the same thing. They're wrong in saying that ERA is going to permit homosexual marriages. That will only happen if a state law permits homosexual marriages between men--then it will have to permit homosexual marriages between women, as well.

The "radical" label applied to women's groups is also viewed in relationship to the ERA. The ERA is perceived by these feminists as being very radical, but not in the way that some people consider it to be, i.e., a left-wing attempt to change the structure of American society. Rather, it is radical in the sense that many aspects of society will be changed if it is ratified, not the least being the compensation of women employees. Underlying any discussion of equal pay for women is a transmitted attitude that suggests that in the view of these women business, in general, is negative to the concept of equal rights for women.

It all depends on how you define radical. The same woman who doesn't identify with the "radical" women in the women's movement would say she supports equal pay for equal work and that indeed is radical. Business is the only one that

understands that and they know what it means, and so they (business) are against it.

The criticism by conservative groups of the Equal Rights Amendment because of its "anti-family" implications is challenged by these women who consider themselves, and the women's movement, as very pro-family, if not in the traditional sense. They are resentful that anti-ERA forces have been able to position themselves as pro-family and pro-ERA forces as anti-family.

I really resent the fact that they have captured the term pro-family. I think that we are probably much more pro-family than they are. They see the family as something that is extraordinarily rigid--they see it as the mother and father and two kids. The father works and the mother is at home--working at home--which they don't recognize either, but the mother raises the children and manages the household. That's a very small minority of families in this country. Women have been forced to work because they need the money. What we are saying and what the reality is today is that the family is everything--the family is any group of people that lives together and works in economic and loving support. It can be an extended family, it can be a nuclear family, it can be a woman and her children, it can be friends who live together.

The individual woman who is opposed to the Equal Rights Amendment is viewed as being either misguided or misinformed--not only on the issue of the ERA, but on what should be her role in society. This is attributed not only to the media's presentation of the ERA and the propaganda of the anti-ERA forces, but because of the way she herself has been socialized. In response to the direct question "Who is the woman who is against the passage of the Amendment?" the following descriptions were provided.

She is the woman who is frightened into believing she needs a special kind of protection. When you grow up conditioned to the idea that you are dependent for a reason--that you are

naturally less able to make decisions that affect your life-- that you don't have stability emotionally--that you don't have a brain that reasons as clearly or adequately as a man's-- that you are physically unable to stand certain pressures--then you need protection and are fearful of not having it. The opposition has played on this fear in my view in a way that is wicked, and moreover they are wicked because they lie.

Women who have gone from being their fathers' daughters to their husbands' wives are against it, but old people have a real perspective of how unequal the situation is.

The women interviewed feel that older people, particularly older women, generally acknowledge that women are discriminated against and that the privileges that the anti-ERA forces cite as being of value to women in today's society do not, in fact, really exist. Further, they feel that neither education nor social background are determinants in attitude toward the Equal Rights Amendment, but rather life experience and exposure to anti- or pro-ERA groups or propaganda.

I don't think education makes a difference or background. We have had neighborhood women from Brooklyn visit us here who can't get into the state supported recreation center because the men own the bocce courts. One old woman told me she wanted to live long enough to be able to use the bocce court--she wanted to liberate the bocce court.

Once a woman realizes that she, and women in general, are discriminated against, according to the respondents, she will be in favor of the Amendment.

I think that most women do not want to be discriminated against when it comes down to the nitty-gritty elements of their lives.

I'm not a feminist but I don't want to be taken advantage of. I want my daughter to have the same opportunities that my son does. We often hear that.

I don't want to be penalized by the inheritance laws-- we hear that from farm wives.

Further, these women feel that opposition to the ERA is not as large as it is thought to be. They base this public opinion polls that although they do not reveal a consensus in favor of ratification of the Amendment, reveal that most people are for its ratification.

I think very few people are against the Amendment. The leadership of the opposition, i.e., Phyllis Schlafly, however, is extremely vocal and very creative and strong in her use of tactics. Perception of the size of opposition to the ERA is bigger than it actually is.

I think what's hurting the ERA is fear--fear in terms of what Schlafly's people say. But that's not what's holding up the ERA--what's holding up the ERA is power politics in three or four states. What's also holding up ERA is that people give lip service to the ERA but don't put the push behind it. If Carter did the same amount of wheeling and dealing on the ERA as he did on the Panama Canal we could have the ERA.

The reason the Equal Rights Amendment has not been ratified, according to these women, is because of the voting behavior of the State Legislators in response to pressure from special interest groups.

The people, a majority of the people want the Amendment although there is not a consensus, but the legislators are the ones that must be overcome. They are fighting the Equal Rights Amendment not because they feel they are reflecting the views of their constituency but more because of private pressure groups not reflecting, necessarily, the views of the people. The only way you can get to the legislators is by the same kind of pressures put on them by other groups or by replacing them by putting money behind pro-ERA candidates.

Put another way,

The reason the ERA has not been ratified has nothing to do with support of the ERA, at all. For instance, in Nevada they elected legislators who said they would support ERA and eleven of those people changed their vote after being elected. That has happened state after state. The polls in Nevada showed support--60-65 percent, but there was power politics in the state legislature that prevented it being passed. The same thing happened in Florida and North Carolina and this year in South

Carolina. It was a case of people being coerced into changing their votes.

The change in votes on the part of individual legislators, as a result of political pressure, is thought to be the major problem in the ratification of the Equal Rights Amendment.

We know there is majority support for the Amendment. We know that the states that have not ratified the Amendment have experienced some breath-taking double crosses. There were journalists in here from South Carolina yesterday and they said that the legislators went on the record saying they were going to support the Equal Rights Amendment and that when the ultimate vote was taken there was an absolute reversal of their vote. We know that in Florida before the vote was taken the population voted 4 to 1 for the passage of the Amendment and it lost by two votes. We know that, in the final analysis, one of the legislators who backed out was a Mormon.

In response to the direct question "Do you really consider the Mormon influence important?"--"Terribly."

The source of funds to fight the Equal Rights Amendment is not completely known, according to one of the women, however. Some generally accepted sources are mentioned in that context.

To the best of our ability to determine it seems to be heavily Mormon, the coalition of forces--the John Birch Society and the National Rifle Association, the Catholic Church, Right to Life organizations and Stop ERA.

Pro-ERA forces have focused their efforts on extension of the deadline for ratifying the ERA since the apparent stalemate in the ratification process. Concurrent with this has been an economic boycott of non-ratifying states so as to answer pressure with pressure.

One of the reasons why the seven year extension makes very good sense is that there are states, I am sure, that although wildly inconvenienced by the boycott which is just beginning to gain momentum--there are states that will say I think "Dammit, we just have to hold on for one more year and it will

all be over; however if there is a seven year extension I think it's fair to say the potential of that boycott for seven years, and don't forget most organizations do make their convention commitments many years in advance--that will make a considerable difference.

Both the women interviewed were apprehensive about the ratification of the Amendment, in spite of their continued full scale efforts in that direction.

I hope it passes in my lifetime. I'm honestly scared to death that it's not going to be passed by 1979.

I'm not sure at all that it will be extended--there is some chance.

Even should the ERA Amendment be passed there is reason to believe that full-scale equality for women will not easily be achieved. As one of the women put it.

Even when we get the Equal Rights Amendment, that doesn't mean that's going to be the end of discrimination against women in this country.

Anti-Era Interviews

The anti-ERA women interviewed, an active member of the Right to Life movement who is against the ERA and the housewife head of a New York City chapter of Stop ERA, both claim that they are opposed to the ERA, but not opposed to the concept of equality for women. As one woman said, "We are for equal rights for women, but not for this Amendment."

Opposition to the Amendment was presented in terms of the Amendment not offering any more equality to women than is already provided by the Constitution, and that if the ERA were passed it would have what they perceive to be unfavorable consequences. In explaining why she

is opposed to ratification of the ERA, one woman said:

My personal feeling is that the ERA will not add anything to what already is in the Constitution, and I don't feel it would do anything for me.

The other woman put it this way:

I don't think the Equal Rights Amendment will help women; that is separate from my commitment to equal rights.

One of the women felt that more could be accomplished in the area of discrimination against women by "women helping women" than through the courts, citing what she sees as the lack of success of past civil rights legislation.

I think that in America today a lot of women are discriminated against in a lot of situations--real estate, particularly--advancement in corporations--banking--and so on. I was in agreement with the legislation for civil rights, but in retrospect I don't know how much was accomplished by the civil rights legislation that was passed. It was like a drop in the bucket and the Equal Rights Amendment would fail in the same way. The experience of the civil rights legislation makes me feel nothing is accomplished through the courts. More can be accomplished by public relations than legislation. The courts are a dead end.

Further, both the women viewed the Equal Rights Amendment as another example of government interference in individual rights with negative consequences, i.e., "the less the government has to do with protecting individual rights the better off we are." The women not only objected to government interference in the area of equality for women because they felt it had no right to interfere in that area, but because they felt that the individuals in the government who were advocating interference in the area of women's rights were not acting in the best

interests of the country and did not reflect the views of the citizenry. Their criticisms were not directed at elected officials, but to the "bureaucrats in Washington."

I think it's the federal bureaucrats who would really like to see a different way of life--it's socialistic. Our schools are being run by the federal government. We're losing the whole government to the bureaucrats. The whole bureaucracy in Washington has been there for many years--it isn't really even political. They come and they stay. I think they are people who think that society could be conducted along tidier lines shall we say. For instance, they very much would like to see a massive network of day care, child care, set up as the norm. The radical feminists have long been talking about the right of every child to day care. That's not the same as the right to good care. They're not talking about day care to supplement maternal care. They are talking about day care--everyone is more or less thrown on society--it is the direct responsibility of society for everyone. This is breaking down the moral and legal status of the family. I think the hardest thing society has to compensate for is a broken family. An example of this is the denial of parental rights that have come about in regards to abortion. Parents are being denied legal and moral rights as regards their children.

In further discussion, the issues of abortion and threats to the American family frequently are raised as some of the unfavorable consequences that would arise from passage of the Equal Rights Amendment. Put another way--

We could wind up with cultural results that the vast majority of American people would not want--the antithesis of the Judeo-Christian ethic. Without that you have no sound basis for rape laws.

And--

We (Stop ERA) haven't taken an official stand on abortion, but we are fighting for parental consent for abortions on children.

We are going to see more men leave their families and more women and children on welfare.

Another unfavorable consequence of the Equal Rights Amendment would

be the drafting of women and service in combat and, as one woman put it, "there isn't a civilized country on earth that puts women into combat."

Both women stated that one of the major reasons they were opposed to the ERA was because they felt that its passage would result in widespread acceptance of homosexuality in American society. This was another example they cited of how the Amendment would threaten the structure of American society and the American family, and was far more important to them than any possibility of loss of privileges they feel they, as women, now have.

I believe that women would lose in some ways by the passage of the Equal Rights Amendment, but more importantly I believe that the Equal Rights Amendment would give credence to the full scale acceptance of homosexuality on an equal basis with heterosexuality.

Both women felt that the organized women's groups, especially NOW, that have been very vocal in support of the Equal Rights Amendment are greatly influenced and are dominated to some extent by homosexuals. They feel that most women do not want to be associated with homosexuals.

I think women get in a furor at the idea of being aligned with homosexuals. They find it revolting.

One of the women repeatedly referred to the fact that she did not question the fact that women were discriminated against in American society and that she believed in equality, but that she was against the passage of the ERA. She feels that she reflects the attitude of many women opposed to the women's groups that support the Amendment even more than are opposed to the Amendment itself.

It's ironic that these women who have been discriminated against don't feel that they have to work to get this legislation passed. They're not interested, basically, because they feel that NOW doesn't represent them; it represents what they think are rich upper class women they have nothing in common with-- women who don't understand their problems. Maybe it's resentment, but they have nothing in common with lesbianism or the women's liberation movement.

Put another way, working for passage of the ERA is a "professional woman's type thing."

When questioned as to who they felt were in favor of the ratification of the Equal Rights Amendment the following were mentioned: "Organized homosexuals, government bureaucrats, well-meaning religious groups, and sociological visionaries who feel we can't have too much equality."

Those opposed to the Amendment are those women "who come from every walk of life--every socioeconomic level. Once women are in full possession of the facts they know that the Amendment is unnecessary, uncertain in its implications because it's so open-ended, and undesirable." Neither one of the women voiced an opinion on the implications of passage of the ERA on men except to refer the different attitudes toward women held by young men, i.e., "I feel that young men think that marriage is a total partnership."

These anti-ERA women feel that the media discriminate against them and that the women employed by the media do not reflect their point of view.

We have never been given even-handed treatment. There is a lion's share of feminists with media, itself. In 1973, feminists were approaching broadcasting stations and signing contracts that said the stations should present the views of

feminists. These feminists think that they have the right to speak for American women, and they don't.

The media and most of our journals have not leveled with the American public. You really have to go far afield to get an even-handed discussion of the ERA.

Ironically, while criticizing the media for a feminist bias, they credit the media's presentation of the feminist perspective with first alerting them to the dangers of the ERA.

The radio and TV talk shows led us to believe there was much more to ERA than equal pay for equal work. We found out it would be a massive decisive sociological change. For one thing the wording is deceptively simple--we don't know in our current culture what rights are--and what interpretation will be put on sex. It's all open-ended--it's up to the courts to decide.

When discussing reasons why the ERA has not been ratified up to now one of the women said that, in her opinion, the ERA had been presented in a way that created a problem for many people.

We live in a world of packaging and it was packaged wrong--those congresses for women were a total waste of time. Dominated by lesbians and pro-abortionsits--and our taxes paid for it!

The other woman said that women feel that there would be problems in trying to achieve total sexual equality in America today.

We pride ourselves on being a free and democratic society and it's hard to come out against equality, but there is no doctrine of perfect equality. If you treat people who are not the same equally you're treating them unfairly.

She added that,

Basically, I guess I feel that women don't really have the need to go high up in the world.

Neither of the women feel that the Amendment will be ratified primarily because "the people" are against it and the legislators know

that.

I don't think the Equal Rights Amendment will go through. I don't really know the climate in all of middle America, but in the states I know I feel women, middle class women raising families, will not make an effort to see this is passed. I think the women in America are the decision makers and the legislators follow what they tell them to back by letters. Middle class women are just not interested in it--it's just not necessary or desirable.

Resentment against feminists and the organized women's movements, NOW being the one most often mentioned, is carried over in any discussion of extension of the time needed for ratification. NOW is identified always as the prime support for ERA.

I think it's unmitigated gall for NOW to ask for extension--it's a historical first. No way will it be extended.

Although both women feel the ERA will never be passed, they feel that if by chance it is it "will not amount to a row of beans," and furthermore, will not provide equality for women. "The Amendment is not going to do it."

Non-Activist Interviews

Both the successful business women interviewed are in favor of the Equal Rights Amendment, but neither has joined a feminist organization nor actively worked for passage of the ERA. Although both are members of professional organizations that have taken an official stand of support for the Amendment, neither has served on any committee concerned with the organizations' stand on ERA. One of the women, the president of her own business, did not feel that the passage of the Amendment would affect her, nor was it something that was at all of

paramount importance to her.

The Equal Rights Amendment won't help me. I don't relate my whole life to the place of women in society.

The reasons that neither women had actively worked for passage of the Amendment fell into two major categories. They were busy with professional activities and personal interests and they were intensely involved with their own careers. The same woman quoted above said:

My activities are more in the professional field and some charitable. I don't even know anyone who belongs to a group that is fighting for or against the ERA. I am just not involved with it at all.

The other woman described her reason for non-activity as regards the ERA as follows:

I don't have the time to take out of my work to be a leader for the Equal Rights Amendment. I've been fighting all my life. The white woman is the new girl in town when it comes to equal rights--she's gung ho--she's fighting for equal pay--that's her biggest fight. Black women have been screaming for that for years and no one listened.

In discussion as to why black women generally have not been active in working for the passage of the Amendment, this woman, a black, referred to the movement for passage of the ERA as "a white woman's fight" because white women have a better chance of getting it passed.

The ERA is the white woman's fight. I think that black women, black people, have been fighting for equal rights all their lives and it seems like it's come to be noticed once white women get into it. All black women are for equal rights, but they don't feel they should work as hard for it because it is a white woman's fight. They have more of a chance of getting it passed. It will be passed faster if white women lead it. Then they can get black women to go in with them. I think black women feel they fight every day of their lives for equal rights.

In addition to black women certain other groups of women were

thought to be likely to be for passage of the Amendment. "Working women, women who want to be independent, and young people."

The type of person who would be expected to be against the Amendment presented stereotyped pictures to both these women. The personality of some of the anti-ERA women was described in terms of timidity and lack of confidence.

The woman who is against it feels she needs a man to take care of her--she's afraid to be independent.

Other anti-ERA people were referred to as follows:

People who are unsure of themselves or their worth as human beings are against ERA.

They are people who have been frightened by anti-ERA forces in terms of what they've been told--they can't have child support--they can't have alimony.

A lot of men are against ERA although they are smart enough to give lip service to it at work or in their professional relationships with women. They are wearing masks--a lot of them. I'm sure they go home at night and complain to their wives about the women's libbers they have to put up with in the office.

Interestingly, some working women are thought to be against the ERA. The type of woman who has achieved a certain level of success in a middle management position by successfully playing the role of the stereotyped woman employee looking to male superiors for guidance and always being "feminine" now finds herself threatened by the new type of working woman who is meeting men in the office on equal terms. As one of the women put it:

I think the kind of woman that would be against the ERA is the kind of woman who has been getting ahead either because she's a woman, a token woman, or because she's always played the old-fashioned woman's role in the office and now there's a

new kind of woman on the scene. This kind of woman feels more threatened by these new women and equality for women, than by men.

Although all black women want equal rights, according to the Black interviewed, they do not want the Amendment passed primarily because it will be easier for a woman to be independent, to get a job outside the home. Black women generally find it humorous that white women sometimes have to struggle with their husbands in order to work outside the home, because this has not generally been the Black experience.

Black women think it's funny when they hear about a white man trying to hold back his wife from getting a job. Black women tend to laugh at that. They have just the opposite feelings. They find they've been working all their lives--and if they're home their husbands are saying why don't you find a job? Black women are playing catch up--black women feel they have had to work twice as hard as a white woman. It's not one set of equal rights--it's double for them--they're women and they're black.

Although both women are aware of the possible negative consequences of ratification of the ERA, as presented by anti-ERA forces, i.e., threatening the structure of the American family or the lowering of moral standards, both feel that there is no valid criticism of the ERA.

I can't see anyone--black or white--losing anything if the ERA is passed--that is, for those of us who want equal rights.

Why would moral standards go down--what does one have to do with the other?

Damage to the American family if the ERA is passed. I don't see how it can--it's already damaged.

Neither of the women think that passage of the ERA would insure equal rights for women. It will, however, be a symbol the equal rights

for women is the ideal situation and that the law demands it even if it does not exist.

I think the ERA is needed to prove to men that there are equal rights for women even though they may not practice it. It will be effective in establishing an ideal.

The ERA should be passed as a symbol of women's equality. No thinking woman thinks women are equal now--they don't think of themselves as equal--salary differential and differential in opportunity. Definitely women are not equal.

If the Amendment is ratified, however, neither one of these women consider that from a practical standpoint women will achieve equal rights. As in all situations in business, which is their experience, there are ways of hiring the types of people wanted and not hiring undesirables. It will, however, serve the purpose of forcing business to look to legitimate reasons for not hiring women.

The law gets passed--we still haven't won. That's only the beginning. It's making the door ajar and they, big business, will have to give better answers for not giving a woman a job. But they'll find a way--they find a way to do everything, but at least we no longer have to accept certain answers.

There are still ways of giving jobs to whomever you want--still ways of getting around it.

But it will keep the door ajar. They'll have to find new reasons and while they're doing that I'll be in. Men are afraid of us--they're afraid to let us in.

Both women think the Equal Rights Amendment will be passed and it will be beneficial to women. Women, however, must help each other. This is the way that women will advance in society and ultimately achieve the same level of success as men.

A few women will get through--a few sisters, and by that I mean women. It's up to them to help other women--learn all you can and teach what you learn.

CHAPTER IV

ANALYSIS OF SURVEY

The questions developed for this phase of the research were aimed at eliciting demographic and background characteristics and attitudes relevant to either a pro- or anti-ERA stand.

The demographic and background characteristics selected were those generally used to classify people: sex, age, education, income, political identification, religious affiliation, and so on. Certain hypotheses were to be tested as regards these demographic and background characteristics, for instance, that younger people were more likely to be pro-ERA than older, and that the college educated were more likely to be in favor of ratification than the noncollege.

Attitudes were examined in relationship to the ERA in two forms. The first set of items was in the form of statements that agreement or disagreement with might be used as predictors of an anti- or pro-ERA stand. A fourfold response category for the twenty-six items was used: definitely disagree, probably disagree, probably agree and definitely agree. For example, an item selected thought to express traditional sex roles was: "A woman's place is in the home." The expectation was that agreement with this statement would be higher among those opposed to the passage of the ERA than those in favor.

The second set of eleven items, of lesser importance to this analysis, was selected to measure people's expectations of what would occur if the ERA should be passed. To measure the degree to which

respondents felt a change would be likely to occur or, if in fact already existed, a fivefold response category was used: definitely not happen, probably not happen, probably happen, definitely happen, and already exist. For example, an item selected that was expected to reflect the expectations of persons who were in favor of or against passage of the ERA was "Anti-family changes will occur."

Respondents were also asked to indicate on a four-point scale their familiarity with the Equal Rights Amendment. This question, and the following question relating to their attitude toward the passage of the Amendment after a description of it was provided, followed the first item set relating to values so as to provide as unbiased a position on the questionnaire as possible for the twenty-six value items which were intended to provide the primary basis for analysis.

A limitation of the self-administered technique employed is, of course, that the order in which the questions are read and answered cannot be controlled. Therefore, the bias, if any, created by the presence of the above mentioned two questions on the responses to the two sets of value items cannot be measured.

Familiarity with the Equal Rights Amendment

Although there are many vocal anti- and pro-ERA groups in America today, the degree to which people are familiar with the proposed Amendment has been a subject of conjecture. Among the 838 respondents in the sample, approximately 70 percent said they were either very familiar (16 percent) or somewhat familiar (54 percent) with the Amendment.

The level of familiarity was about the same among respondents who were either for or against passage of the Amendment. (See Table 7.)

TABLE 7
FAMILIARITY WITH THE EQUAL RIGHTS AMENDMENT

	Total	ERA Definitely/ Probably Should Pass	ERA Definitely/ Probably Should Not Pass
Very familiar	16%	16%	18%

Not stated	1	a	1
Base	(838)	(551)	(272)

^aLess than 0.5 percent.

As might be expected the data reveal that certain groups are less familiar with the ERA than others: the fifty years of age and older group, those of lesser education, individuals from lower income households, and blue collar workers and homemakers as contrasted with white collar workers. People who live in nonmetropolitan areas are directionally lower in their familiarity with ERA than individuals from metropolitan areas. Men and women are virtually identical in their familiarity with ERA. (See Table 8.)

^aSignificant at the 95 percent level.

^bLess than 0.5 percent.

There is no real difference among Democrats, Republicans, and Independents in regard to their professed familiarity with the Amendment. There is, however, a difference between people who consider themselves active politically as opposed to those who claim they are not at all active. It would be expected that those who are active politically would be more familiar with a proposed amendment to the Constitution than the politically nonactive. Self-identified Moderates and Conservatives, in regard to their political views, are less apt to be familiar with the Amendment than people who consider themselves Liberals. (See Table 9.)

Familiarity with the Amendment does not vary by frequency of church attendance and there is no real difference in the degree of familiarity with the Amendment expressed by Protestants and Catholics. The small number of Jewish respondents in the sample (33) does not permit conclusions to be drawn about them in comparison to the larger Protestant and Catholic groups. (See Table 9.)

Attitude Toward Passage of the Equal Rights Amendment

Approximately one-third (66 percent) of the respondents indicated that they thought the Equal Rights Amendment should be passed. Of the 66 percent, 34 percent said it "Definitely should be" and 32 percent said it "Probably should be." This was a higher level of positive attitude toward passage of the Amendment than was reported by the Roper,¹ NBC,² and Harris³ Polls taken the same year. Because the four polls were executed by different companies using probably different methods

^aSignificant at the 95 percent level.

^bLess than 0.5 percent.

of sample selection and execution, and additionally asking differently worded questions, it is impossible to draw any valid conclusions about the differences. It is of interest to note, however, that both the Roper and the Harris Polls mentioned the controversy surrounding the Amendment and the NBC Poll mentioned the Amendment in connection with resolutions adopted by "the woman's conference." Only the question used for this study being discussed presented the Amendment, itself, to the respondents before asking the question about attitude toward its passage. (See Table 10.)

One of the hypotheses of this study was that women are more supportive of the Equal Rights Amendment than men. The data do not support this hypothesis inasmuch as there was no significant difference between the two groups in this regard. Nevertheless, women were directionally a little higher in support of the Amendment with 68 percent favoring passage (35 percent saying it "Definitely should be" and 33 percent saying it "Probably should be") while 61 percent of the men said it should be passed (32 percent saying it "Definitely should be" and 29 percent saying it "Probably should be"). (See Table 11.)

The data confirm the hypotheses that the young are more supportive of the Equal Rights Amendment than the older segments of the population. Of the respondents under thirty years of age, 49 percent think the Amendment definitely should be passed. A lesser percentage of individuals 30-49 years of age think it definitely should be passed (32 percent) and even less of those fifty and over (26 percent). The college educated, as expected, were more positive toward its

^aQuestion: The various State Legislatures are now voting on an amendment to the United States Constitution which would assure women equal rights under the law. As I'm sure you know, there is a lot of controversy for and against this amendment. How do you personally feel about it--are you in favor of the Equal Rights Amendment or opposed to it? (Roper)

^bQuestion: The women's conference adopted resolutions on a number of subjects. One resolution called for the adoption of the Equal Rights Amendment to the Constitution--the ERA. Do you favor or oppose passage of the Equal Rights Amendment? (NBC)

^cQuestion: Many of those who favor women's rights favor the Equal Rights Amendment to the Constitution. This amendment would establish that women would have rights equal to men in all areas. Opponents argue that women are different from men and need to be protected by special laws which deal with women's status. Do you favor or oppose the Equal Rights Amendment? (Harris)

^dQuestion: The Equal Rights Amendment states that: "Equality of rights under the law shall not be denied or abridged by the United States or any state on account of sex." Do you think that the Equal Rights Amendment should be passed, that is, should be part of the United States Constitution? (Choices: Definitely should be; probably should be; probably should not be; definitely should not be.) (Crossley)

passage than the noncollege group--43 percent of the college group versus 25 percent of the noncollege group thinking the ERA should definitely be passed. (See Table 12.)

As expected, Liberals (61 percent) think that the Amendment should definitely be passed more often than either Moderates (28 percent) or Conservatives (22 percent). Nonchurch goers are much more positive to the Equal Rights Amendment than church goers. Of the respondents who say they never go to church, 55 percent think the Amendment should definitely be passed. Only 24 percent of regular church goers and 39 percent of occasional church goers feel the same way. (See Table 13.)

Expectations of What Would Occur if the Equal
Rights Amendment Is Passed

When comparing the responses of pro- and anti-ERA groups to the eleven item set of expectations, real differences are found. For example, one of the items selected that was expected to reflect the expectations of persons who were in favor of or against passage of the ERA, "Anti-family changes will occur," did in fact do so. In total, 42 percent of the respondents answered that "Anti-family changes" will "definitely" or "probably" happen if the Amendment is passed, but examination of the two subcells of respondents that were for or against passage showed that 33 percent of the pro-group thought this would occur while 61 percent of the anti-ERA group thought so. Similarly, a large difference was seen in pro- and anti-ERA respondents' expectations when presented with the item "Moral standards will go down." In the pro-ERA group, 22 percent of the respondents felt that "Moral standards will go down," while 40 percent of the anti-ERA group felt this would occur. Also, while 26 percent of pro-ERA respondents felt the "Women will become more like men" if the ERA is passed, 40 percent of the anti-ERA groups thought this would occur. (See Tables 14 and 15.)

In regard to changes that would occur in a working environment, anti-ERA people are less likely to think that changes such as "Men and women will be treated equally in getting jobs and promotions at work" and "Men and women will get the same wages for the same work" will occur should the ERA be passed than do pro-ERA people. "Men and women will be treated equally in getting jobs and promotions at work"--73

TABLE 14

EXPECTATIONS OF CHANGES THAT WILL DEFINITELY OR PROBABLY HAPPEN IF THE

^aSignificant difference at the 95 percent level.

^bLess than 0.5 percent.

percent of the pro-ERA people thought this change would "definitely" or "probably" happen as opposed to 59 percent of the anti-ERA group thinking so. "Men and women will get the same wages for the same work"--76 percent of the pro-ERA respondents felt this change would "definitely" or "probably" occur as opposed to 63 percent of the anti-ERA thinking so. (See Tables 14 and 15.)

Changes that would be anticipated in relationship to current laws or implementation of laws also show some differences between the pro- and anti-ERA groups. Both groups anticipate the "Men and women will be equally responsible for financial support of children"--the pro-group to a slightly lesser degree (72 percent) than the anti-group (78 percent). Of the pro-ERA group, 69 percent think that "Men and women will both be subject to future military drafts" while 76 percent of the anti-ERA group anticipate that change if the ERA is ratified. Only a little more than half (53 percent) of the anti-ERA group anticipate that women will be treated equally under the law with passage of the Amendment in contrast to 67 percent of the pro-ERA group anticipating that change. (See Tables 14 and 15.)

It appears that both pro- and anti-ERA groups anticipate changes more in regard to current laws or implementation of laws and the work environment, should the ERA be passed, than in the moral or social climate of society.

Because no attempt was made within the scope of this survey to determine if an expected change would be viewed as either positive or negative, it is impossible to draw conclusions as to the reasons

for either a pro- or anti-ERA stand based on expressed expectations of changes should the ERA be passed. For example, of the 53 percent of the anti-ERA group who felt that "Men and women will be treated equally under the law" (either "Definitely" or "Probably" should the ERA be passed), it might be hypothesized that some feel that sexual equality under the law would be desirable and some feel it would not be. Those who feel sexual equality under the law would be a positive change, but are against the proposed Amendment, may feel so because they think the Amendment as worded could open the way for what they consider undesirable consequences, i.e., homosexual marriages, or simply because they are not in favor of any more changes in the Constitution. In contrast, those who think that sexual equality under the law would not be desirable may be against the Amendment because women would lose certain "protection"⁴ customarily afforded them under the law, or because they interpret "equality under the law" to mean that women will be subject to a military draft. (See Table 14.) Two of the items selected, however, can be assumed to represent what might be commonly considered as negative changes in American society--"Moral standards will go down" and "Anti-family changes will occur." When removing from the base those individuals who did not answer or think that these situations already exist, large differences exist between the expectations and pro- and anti-ERA groups. It is of interest to note, too, that even among pro-ERA respondents, 39 percent think that anti-family changes will occur and 27 percent think that moral standards will go down if the Equal Rights Amendment is passed. (See Table 16.)

Values of the Pro- and Anti-Era Individuals

The value items used in the questionnaire were grouped prior to analysis so as to provide overall descriptions of several individual value items. The groups used were:

Sex role traditionalism--a woman's place is in the home, women should not be permitted to do some types of work in mining, construction, steel work, etc., men are less emotional than women, and so on.

Egalitarianism--if men and women do the same job they should get the same pay and benefits, people should be given jobs and promotions strictly on basis of ability, no matter what their sex (race), boys and girls should get the same choice of subjects in school--shop, sewing, etc., and so on.

Abortion--the single item of a woman should have the right to decide whether or not to have an abortion.

Authoritarianism--everyone should have a strong respect for authority and laws should always be obeyed, even if one disagrees with them.

Free enterprise--the government should stay out of business as much as possible, the government is providing too many services that should be left to private enterprise, social security should be based on what paid in.

Welfarism--the single item of social security should provide everyone with a good standard of living no matter how little the person actually paid in.

Female preference--women should be given preference for jobs and

promotions when there is a history of prior discrimination against women, even if the women, themselves, were not discriminated against personally.

Cynical realism--you cannot blame people for taking all they can and it is who you know rather than what you know that is important in getting ahead.

Fatalism--a person has very little control over his own fate and people can actually do very little to change their lives.

It was decided to look at the value items in the strictest sense, the respondents volunteering a "definitely agree" answer, in an attempt to more finely differentiate the values of the two groups.

There were differences between pro- and anti-ERA respondents when looking at the value items relating to sex role traditionalism. The anti-ERA group was much more traditional than the pro-ERA group especially in thinking there should be a limiting of the kind of work women should be permitted to do. The responses seem to indicate that there is a perception of differentiation of the sexes, but not a real feeling that men are superior to women. (See Table 17.)

When looking at value items relating to egalitarianism, both groups score high in most items. The item related to the drafting of women differs, however. It is apparent that the drafting of women would not be popular with either group.

There was a much higher agreement from pro-ERA women than anti-ERA women (65 percent to 41 percent) as to a woman's right to an abortion.

The anti-ERA group is more authoritarian, more committed to the

People can actually do very little to change their lives	3	6
Base	(551)	(272)

free enterprise system, and less committed to the idea of government provided welfare and services than the pro-ERA group. Neither group felt that women should be given preference to overcome past discrimination. It should be noted, however, that there is no way to tell if the respondents believed that past discrimination had taken place. (See Table 17.)

Values of Homemakers

Homemakers were compared to blue collar and white collar respondents on both the eleven and twenty-six item sets.

When asked of their expectations should the Equal Rights Amendment be passed, the biggest difference seen in the responses of the three groups was to the item "Women will die at the same ages as men" when 35 percent of the homemakers said they thought that would definitely or probably happen, as compared to 18 percent of white collar workers and 23 percent of blue collar workers. (See Table 18.) It could be hypothesized from this that homemakers consider working outside the home stressful.

When asked to indicate their agreement with the first item set of values, the homemakers expressed definite agreement with the two items relating to authority more than the white collar and blue collar groups. (See Table 19.)

Profile of Pro- and Anti-ERA Groups

The anti-ERA person, in comparison to the pro-ERA person, was more likely to be married than nonmarried, older, less educated, Protestant, a church goer, a conservative or tending toward conservatism, slightly more active politically than the pro-ERA person and more middle income than lower income. (See Table 20.)

Conclusions and Implications for Future Research

The lack of consensus for passage of the Equal Rights Amendment stems more from fear that the passage of the Amendment would pose a threat to the American family and moral standards than from a lack of commitment to equality for men and women. Those most against the Amendment are those people who hold the highest regard for traditional values and customs--the middle income, church going, older population. Because the groups that have been most active and vocal in working for passage of the Amendment have, at the same time, been outspoken in their espousal of more socially "radical" changes like homosexual rights and abortion on demand, it can be hypothesized that some individuals who are in favor of equality for men and women in the eyes of the law may be against the present Amendment because it has the support of those groups that they feel pose a threat to the American traditions they value. They feel, because of the support these groups give the ERA, that the Amendment has greater implications for change than is apparent from its wording, and that it is the interpretation of the Amendment

APPENDIX

Interview Guide

- I. Involvement in organizations concerned with the proposed Equal Rights Amendment to the Constitution of the United States.
 - A. Status in organizations.
 - B. Degree of commitment to goals of the organizations.
 - C. Reasons for commitment.
- II. Perception of attitudes held by people toward the ratification of the Equal Rights Amendment.
 - A. Who is for ratification of the Amendment and why.
 - B. Who is against ratification of the Amendment and why.
- III. Reasons their organizations, if any, present the Equal Rights Amendment to audiences as they do.
 - A. Who determines the approach--who sets policy.
 - B. Who do they hope to reach.
 - C. Who do they hope to influence.
 - D. What changes in attitude and behavior do they anticipate as a result of their speeches and writings.
- IV. Evaluation of the mass media's presentation of news about the Equal Rights Amendment.
 - A. Degree of bias perceived in presentation.
 - B. Reasons for bias, if any.
- V. Reasons why the Equal Rights Amendment is encountering difficulty in the ratification process.
 - A. Is there a "coalition" of groups for or against the ratification of the Equal Rights Amendment.
 - B. Are the legislators who are voting for or against ratification reflecting the views of the constituents or reacting to pressure groups.
 - C. Which pressure groups, if any.

- VI. Opinion as to what will happen to the proposed Equal Rights Amendment.
- A. Will there be an extension of the deadline for ratification.
 - B. Will the Amendment eventually be ratified.
 - C. If so, within what period of time.
 - D. What changes would occur in society if it is ratified--social, political, economic.

The distribution of the responses of the 838 cases is indicated next to the questions.

CROSSLEY SURVEYS, INC.

MARKETING, TRANSPORTATION AND COMMUNICATIONS RESEARCH SINCE 1926

909 THIRD AVENUE · NEW YORK, N. Y. 10022 · (212) 752-4100

NATIONAL RESEARCH STUDY

This questionnaire is part of a research project to provide greater understanding of people's attitudes towards themselves and the events that are occurring in the world today.

Your home has been selected by a random method. Therefore, your responses are representative of many other people as well as yourself. For this reason your help in answering the questions accurately and completely is very much needed. It will probably take you about 10 minutes to complete the questionnaire.

The information gathered in this questionnaire will be used for research purposes only. Your answers will be held in strictest confidence.

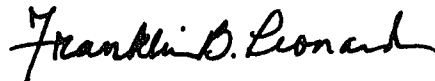

There are no "right" or "wrong" answers in this questionnaire. The only "right" answers are what you believe to be true. Answer as carefully as you can. Be sure to give only your opinions, so don't discuss the questionnaire with anyone else until after you have completed it.

Thank you in advance for your help. Please mail the completed questionnaire back to us as soon as possible. A stamped addressed envelope is enclosed for your convenience.

If you would like a summary of this study when it is completed, fill in the label on the bottom of this page. Please do not write your name anywhere else on this form. Thank you again.

Sincerely,

CROSSLEY SURVEYS, INC.

Franklin B. Leonard
President

5. A woman's place is in the home	<input type="checkbox"/> 338	<input type="checkbox"/> 190	<input type="checkbox"/> 186	<input type="checkbox"/> 111	13
6. People can actually do very little to change their lives	<input type="checkbox"/> 626	<input type="checkbox"/> 125	<input type="checkbox"/> 47	<input type="checkbox"/> 32	8
7. Women are instinctively more gentle than men	<input type="checkbox"/> 184	<input type="checkbox"/> 223	<input type="checkbox"/> 275	<input type="checkbox"/> 148	8
8. Students should be admitted to professional and other schools by exactly the same standards, no matter what their sex	<input type="checkbox"/> 29	<input type="checkbox"/> 29	<input type="checkbox"/> 131	<input type="checkbox"/> 644	5
9. You can't blame people for taking all they can get	<input type="checkbox"/> 377	<input type="checkbox"/> 231	<input type="checkbox"/> 142	<input type="checkbox"/> 79	9
10. People should be given jobs and promotions strictly on the basis of ability, no matter what their race	<input type="checkbox"/> 19	<input type="checkbox"/> 14	<input type="checkbox"/> 102	<input type="checkbox"/> 701	2
11. If there is ever a military draft again, both men and women should be subject to it	<input type="checkbox"/> 237	<input type="checkbox"/> 207	<input type="checkbox"/> 192	<input type="checkbox"/> 196	6
12. Laws should always be obeyed, even if one disagrees with them .	<input type="checkbox"/> 43	<input type="checkbox"/> 82	<input type="checkbox"/> 270	<input type="checkbox"/> 435	8
13. Men are better than women in most things	<input type="checkbox"/> 471	<input type="checkbox"/> 204	<input type="checkbox"/> 97	<input type="checkbox"/> 53	13
14. Social Security benefits should be strictly like insurance, based on how much people pay in	<input type="checkbox"/> 163	<input type="checkbox"/> 196	<input type="checkbox"/> 203	<input type="checkbox"/> 273	3
15. Women should be given preference for jobs and promotions when there is a history of prior discrimination against women, even if the women, themselves, were not discriminated against personally	<input type="checkbox"/> 439	<input type="checkbox"/> 204	<input type="checkbox"/> 122	<input type="checkbox"/> 63	10
16. The government is providing too many services that should be left to private enterprise	<input type="checkbox"/> 95	<input type="checkbox"/> 185	<input type="checkbox"/> 245	<input type="checkbox"/> 295	18
17. Since women live longer than men, they should pay lower life insurance rates	<input type="checkbox"/> 172	<input type="checkbox"/> 190	<input type="checkbox"/> 299	<input type="checkbox"/> 163	14
18. Students should be admitted to professional and other schools by exactly the same standards, no matter what their race	<input type="checkbox"/> 16	<input type="checkbox"/> 7	<input type="checkbox"/> 108	<input type="checkbox"/> 700	7
19. A person really has very little control over his own fate . . .	<input type="checkbox"/> 477	<input type="checkbox"/> 221	<input type="checkbox"/> 82	<input type="checkbox"/> 45	13
20. Men should make most of the important decisions in families because they are generally more intelligent and rational than women	<input type="checkbox"/> 503	<input type="checkbox"/> 186	<input type="checkbox"/> 79	<input type="checkbox"/> 65	5
21. If men and women do the same job, they should get the same pay and benefits	<input type="checkbox"/> 19	<input type="checkbox"/> 6	<input type="checkbox"/> 74	<input type="checkbox"/> 733	6
22. Social Security should provide everyone with a good standard of living no matter how little the person has actually paid in .	<input type="checkbox"/> 256	<input type="checkbox"/> 198	<input type="checkbox"/> 198	<input type="checkbox"/> 179	7
23. It's who you know rather than what you know that is important in getting ahead	<input type="checkbox"/> 207	<input type="checkbox"/> 208	<input type="checkbox"/> 293	<input type="checkbox"/> 120	10
24. Men are less emotional than women	<input type="checkbox"/> 212	<input type="checkbox"/> 212	<input type="checkbox"/> 268	<input type="checkbox"/> 142	4
25. People should be given jobs and promotions strictly on the basis of ability, no matter what their sex	<input type="checkbox"/> 15	<input type="checkbox"/> 16	<input type="checkbox"/> 105	<input type="checkbox"/> 701	1
26. A woman should have the right to decide whether or not to have an abortion	<input type="checkbox"/> 136	<input type="checkbox"/> 77	<input type="checkbox"/> 146	<input type="checkbox"/> 477	2

6

And now, some questions about something currently in the news - The Equal Rights Amendment.

1. How familiar are you with the Equal Rights Amendment?
- Very familiar 136
 Somewhat familiar 453
 Not too familiar 205
 Not familiar at all 38

THE EQUAL RIGHTS AMENDMENT STATES THAT: "EQUALITY OF RIGHTS UNDER THE LAW SHALL NOT BE DENIED OR ABRIDGED BY THE UNITED STATES OR ANY STATE ON ACCOUNT OF SEX."

2. Do you think that the Equal Rights Amendment should be passed, that is, should be part of the United States Constitution?
- Definitely should be 287
 Probably should be 264
 Probably should not be 133
 Definitely should not be 139

N.A.
15

Suppose the Equal Rights Amendment becomes law, that is, is passed. Some changes will happen. Which of the following do you think will happen? Or do some of these things already exist?

	Definitely		Probably		Already		N.A.
	Not Happen	Not Happen	Happen	Happen	Exist	Exist	
3. Men and women will be treated equally under the law	<input type="checkbox"/> 20	<input type="checkbox"/> 123	<input type="checkbox"/> 346	<input type="checkbox"/> 179	<input type="checkbox"/> 157	<input type="checkbox"/> 13	
4. Women will become more like men	<input type="checkbox"/> 240	<input type="checkbox"/> 270	<input type="checkbox"/> 204	<input type="checkbox"/> 54	<input type="checkbox"/> 56	<input type="checkbox"/> 14	
5. Men and women will both be subject to future military drafts	<input type="checkbox"/> 50	<input type="checkbox"/> 147	<input type="checkbox"/> 433	<input type="checkbox"/> 164	<input type="checkbox"/> 17	<input type="checkbox"/> 27	
6. Moral standards will go down	<input type="checkbox"/> 195	<input type="checkbox"/> 226	<input type="checkbox"/> 159	<input type="checkbox"/> 77	<input type="checkbox"/> 173	<input type="checkbox"/> 8	
7. Men and women will be equally responsible for financial support of children	<input type="checkbox"/> 21	<input type="checkbox"/> 92	<input type="checkbox"/> 391	<input type="checkbox"/> 226	<input type="checkbox"/> 94	<input type="checkbox"/> 14	
8. Anti-family changes will occur	<input type="checkbox"/> 119	<input type="checkbox"/> 232	<input type="checkbox"/> 257	<input type="checkbox"/> 98	<input type="checkbox"/> 98	<input type="checkbox"/> 34	
9. Men and women will be treated equally in getting jobs and promotions at work	<input type="checkbox"/> 19	<input type="checkbox"/> 154	<input type="checkbox"/> 395	<input type="checkbox"/> 180	<input type="checkbox"/> 84	<input type="checkbox"/> 6	
10. There will be no separate male teams or female teams in school sports	<input type="checkbox"/> 139	<input type="checkbox"/> 369	<input type="checkbox"/> 228	<input type="checkbox"/> 48	<input type="checkbox"/> 40	<input type="checkbox"/> 14	
11. Women will die at the same ages as men	<input type="checkbox"/> 332	<input type="checkbox"/> 271	<input type="checkbox"/> 178	<input type="checkbox"/> 26	<input type="checkbox"/> 15	<input type="checkbox"/> 16	
12. Women will be treated with no more politeness than men	<input type="checkbox"/> 91	<input type="checkbox"/> 312	<input type="checkbox"/> 249	<input type="checkbox"/> 64	<input type="checkbox"/> 110	<input type="checkbox"/> 12	
13. Men and women will get the same wages for the same work	<input type="checkbox"/> 15	<input type="checkbox"/> 97	<input type="checkbox"/> 350	<input type="checkbox"/> 252	<input type="checkbox"/> 91	<input type="checkbox"/> 33	

14. How many groups, clubs, organizations, etc. do you belong to that support the Equal Rights Amendment?
15. How many groups, clubs, organizations, etc. do you belong to that oppose the Equal Rights Amendment?

656 # who do not belong to either opposing or supporting groups

Number of groups that support 134
 (Support only 113
 oppose only 48)

Number of groups that oppose 69

BACKGROUND INFORMATION ... Please remember that all the information in this questionnaire is strictly confidential and will be used for research and statistical analysis only.

1. Are you ...?
- Male 299 NA
 Female 538 1
2. What is your current marital status?
- Married 609 NA
 Divorced 39 1
 Widowed 70
 Separated 10
 Never married 109
3. How old are you?
- 18 - 19 years 23 NA
 20 - 24 years 75 2
 25 - 29 years 122
 30 - 34 years 96
 35 - 39 years 71
 40 - 49 years 128
 50 - 59 years 144
 60 - 69 years 114
 70 and over 63
- 4a. Including yourself, how many adults (18 years of age and older) are living in your household?
- 726 Number of male adults (1 or more)
798 Number of female adults (1 or more)
- b. How many children are there? (Under 18 years of age)
- 416 Number of male children (1 or more)
274 Number of female children (1 or more)
5. In what city and state do you live?
- 1,000,000 + 392 274
 OTHER METRO 261 NE 203 S200 NA
 NON METRO 177 NC 262 W165 8
 NA 8 (CITY) (STATE)
6. Is your residence in ...?
- Large city 236 NA
 Small or medium city 327 2
 Suburban 239
 Rural or farm 34

7a. Please indicate what is closest to your usual occupation, employment, or activity. Please identify the category even if you are currently retired, unemployed, or not working in your usual occupation for some other reason.

Proprietor of large business, high level manager or executive	<input type="checkbox"/>	110	
Professional or college professor	<input type="checkbox"/>	138	
Elementary or high school teacher	<input type="checkbox"/>	112	
Small businessman or middle level executive	<input type="checkbox"/>	140	
Owner or manager of large farm or ranch	<input type="checkbox"/>	39	
Craftsman, technical worker, or foreman	<input type="checkbox"/>	45	NA
Sales worker	<input type="checkbox"/>	34	9
Clerical worker, typist, stenographer	<input type="checkbox"/>	194	
Household or service worker	<input type="checkbox"/>	13	
Laborer, farm worker, unskilled worker	<input type="checkbox"/>	4	
Full time student	<input type="checkbox"/>		
Full time homemaker (housewife)	<input type="checkbox"/>		
Other: <u>Retired/Disabled</u>			

b. If you are currently retired, unemployed, or not working in your usual occupation for some other reason, please indicate here.

Retired	<input type="checkbox"/>	134
Unemployed	<input type="checkbox"/>	49
Other: <u>Disabled</u>		18

8. Are you a member of a union?

Yes <input type="checkbox"/>	113	NA
No <input type="checkbox"/>	669	56

9. Considering all sources of income for everyone in your household, what do you estimate to have been the total income for last year before taxes. (Include interest, government support whether retirement benefits, welfare, unemployment insurance payments, etc.)

Under \$5,000	<input type="checkbox"/>	69	NA
\$5,000 - \$9,999	<input type="checkbox"/>	119	52
\$10,000 - \$14,999	<input type="checkbox"/>	156	
\$15,000 - \$19,999	<input type="checkbox"/>	160	
\$20,000 - \$24,999	<input type="checkbox"/>	101	
\$25,000 - \$29,999	<input type="checkbox"/>	82	
\$30,000 and over	<input type="checkbox"/>	99	

10. What was the last grade of school you completed?

Elementary school	<input type="checkbox"/>	31	NA
Some high school	<input type="checkbox"/>	106	3
Finished high school	<input type="checkbox"/>	264	
Some college	<input type="checkbox"/>	226	
Finished college	<input type="checkbox"/>	208	

11. Are you ...?

Black	<input type="checkbox"/>	39	NA
White Hispanic	<input type="checkbox"/>	118	22
White other	<input type="checkbox"/>	647	
Oriental	<input type="checkbox"/>	6	
American Indian	<input type="checkbox"/>	5	
Other: _____		1	

12a. Are you ...?

Protestant	<input type="checkbox"/>	483	NA
Catholic	<input type="checkbox"/>	210	9
Jewish	<input type="checkbox"/>	33	
No religious preference	<input type="checkbox"/>	88	
Other: _____		15	

b. How often do you go to religious services?

Very regularly	<input type="checkbox"/>	281	NA
Fairly regularly	<input type="checkbox"/>	121	2
Occasionally	<input type="checkbox"/>	304	
Never	<input type="checkbox"/>	130	

13a. With regard to political views, are you ...?

A liberal	<input type="checkbox"/>	68	NA
Slightly liberal	<input type="checkbox"/>	124	26
Moderate	<input type="checkbox"/>	339	
Slightly conservative	<input type="checkbox"/>	184	
A conservative	<input type="checkbox"/>	97	

b. With regard to political party, do you consider yourself a ...?

Democrat	<input type="checkbox"/>	343	NA
Republican	<input type="checkbox"/>	232	35
Independent	<input type="checkbox"/>	224	
Other: _____		4	

c. Are you ...?

Very active politically	<input type="checkbox"/>	23	NA
Somewhat active politically	<input type="checkbox"/>	226	2
Not at all active politically	<input type="checkbox"/>	587

CLUSTER FRAME ASSIGNMENT SHEET
(National Denture Study)

#15832
November, 1977

PSU #:	City/Town:	State:
Mail Point:	Cluster Frame #:	
Interviewer:		

ASSIGNMENT: 15 Successful Household Contacts.

A HOUSEHOLD SCREENING QUESTIONNAIRE MUST BE COMPLETED FOR EACH SUCCESSFUL HOUSEHOLD CONTACT.

1. Start at the household with the next HIGHER LOWER numbered address after

and, continuing in that direction, attempt an interview at each household ON THAT SIDE OF THE STREET. At an intersection, cross the street. Continue in a straight line on the same named street on which you started until you have completed your assignment.

2. If you are interviewing in an apartment house, start at the top of the building and move in a clockwise direction on each floor.
3. Make only one attempt per household to get the listings of the members of the household and to identify the removable Denture Wearers in the household.

Refer to the General Instructions for "checkback" directions that can help to insure the proper representation of MALE and FEMALE Denture Wearers in our study.

4. The result of every household contact must be recorded accurately on the Call Record Sheet.
5. BE SURE TO INDICATE YOUR ROUTE ON THE MAP BELOW. BE SURE TO SHOW THE CLOSEST CROSS-STREETS.

Standard Occupation CodeQ. 7a: Col. 159

- 1 Professional, Technical, and Kindred (0 -- and 1 --)
- 2 Managers, Officials, and Proprietors (R; 250-285; N and 222)
- 3 Clerical, Sales, and Kindred (Y; Z; S; 301-360; 380-395)
- 4 Craftsmen, Foremen, and Operatives (Q; T; W; 401-555; 601-721)
- 5 Service Workers (810-890; P; 801-803)
- 6 Laborers (X; 960-973; U; V; 901 and 905)
- 7 Students
- 8 Housewives, Homemakers
- 9 No answer (to Q. 7a and Q. 7b)

Q. 7b: Col. 160

- 1 Retired (and mentioned usual occupation in Q. 7a)
- 2 Unemployed (and mentioned usual occupation in Q. 7a)
- 3 Disabled, medically disabled, ill
(and mentioned usual occupation in Q. 7a)
- 4 Caring for young children, baby, homemaker (and mentioned
usual occupation in Q. 7a)
- 5 Student (and mentioned usual occupation in Q. 7a)
- 6 Retired (but no usual occupation mentioned in Q. 7a)
- 7 Disabled (but no usual occupation mentioned in Q. 7a)
- 8
- 9 No Answer to Q. 7b

Note: The code in Q. 7a (Col. 159) must be used in conjunction with the Alphabetical Index of Occupations and Industries. The numbers and letters to the right of each code category link that code to the occupation book.

7a. Please indicate what is closest to your usual occupation, employment, or activity. Please identify the category even if you are currently retired, unemployed, or not working in your usual occupation for some other reason.

- Proprietor of large business, high level manager or executive 2
- Professional or college professor 1
- Elementary or high school teacher 1
- Small businessman or middle level executive 2
- Owner or manager of large farm or ranch 2
- Craftsman, technical worker, or foreman 4
- Sales worker 3
- Clerical worker, typist, stenographer 3
- Household or service worker 5
- Laborer, farm worker, unskilled worker 6
- Full time student 7
- Full time homemaker (housewife) 8

Other: _____

b. If you are currently retired, unemployed, or not working in your usual occupation for some other reason, please indicate here.

- Retired 1
- Unemployed 2

Other: _____
